W. H. HALL,  
Acting Statistician.

## MEMORANDA.

*Trade.*—The imports during December were valued at £3,615,246, and were the highest for any month during the year. The total imports for the year were £29,431,828—the largest figure on record, and equal to £19 18s. 3d. per head of population. The direct oversea imports amounted to £14,496,074, as compared with £13,133,857 in 1904. The figures for the year show a total increase of £2,145,870—namely, £582,886 in Australian produce and £1,562,984 in goods of oversea origin. The chief articles of oversea origin showing increases are drugs and chemicals, metal manufactures, spirits, tea, apparel and softgoods. Machines, implements, and timber decreased largely during the year. Gold for coinage shows a considerable increase.

The oversea exports for the month show an increase of £521,562, and for the year of £1,392,102, compared with the corresponding periods of last year. The value of interstate transfers is only available for eleven months, but, even so, it is larger than for the whole of 1904. It is probable that the total exports during 1905 will amount to about 37 millions sterling, equal to £25 0s. 8d. per head of population, and will be thus four millions greater than in 1904, which showed the largest value up to that time. This increase is in spite of the fact that the oversea export of gold during the year decreased by £2,351,156, as compared with the previous year. The largest increase is in wool; copper, frozen meats, tallow, skins and hides, timber and coal also show considerable increases. Wheat, leather, and cocoanut oil show decreases.

*Shipping.*—During the year 1905 there was an increase of over half a million in the tonnage of vessels trading with the State. The tonnage entered increased by 278,332, and the tonnage cleared, by 224,094, as compared with 1904. The tonnage was the largest on record, and was not a great deal short of ten millions, being 9,381,619, of which steam vessels accounted for 8,093,068 tons, and sailing for 1,288,551. The whole of the increase was in steam vessels, as sailing vessels show a slight falling off.

*Public Finances.*—The Public Accounts for December show that the revenue was £1,593,890, or £439,491 more than in December last year. There were increases in the returns from Railways, Taxation,

and Crown lands. The Commonwealth surplus was £19,621 less than in last December. The expenditure during the month was £965,720, or £95,470 less than last December. During the first half of the financial year the revenue has increased by £672,437, and the expenditure decreased by £166,892, as compared with the corresponding period of last year. The chief feature has been a large increase in revenue from Railways and Tramways, amounting to £256,882. The receipts from land show a falling-off of £71,116, and the surplus returned to the State by the Commonwealth increased by £62,740. During the half-year the receipts exceeded the expenditure by £301,051. In 1904 the excess of expenditure was £538,278. The net expenditure from General Loan Account on Public Works and Services for the half-year was £738,815, or £178,719 less than last year. In addition, Loans and Treasury Bills have been paid off or exchanged to the amount of £831,100, while new securities have been issued representing £1,581,909.

*Wheat Crop, 1905-6.*—It is estimated that the wheat yield during this season will be 20,489,000 bushels from 1,837,550 acres, or about 11 bushels per acre, while the hay crop will be 339,500 tons from 348,110 acres. Reports say that the quality shows a considerable improvement on last year's grain. Many of the crops average 62 lb. per bushel and over. The proportion of the crop in the various districts served by the three main lines of railway will be Southern, 53·8 per cent.; Western, 34·3 per cent.; and Northern, 11·5 per cent.; the balance being in districts not served by railway. After allowing for home consumption and seed requirements, the amount available for export will be about 10,000,000 bushels.

*Prices.*—The index numbers show that during 1905 prices were generally about 15 per cent. higher than in 1901, and 7½ per cent. higher than in 1904. The index number for pastoral produce was 1,192, and for metals 1,149. Since 1901 the greatest rise in prices has been in wheat, wool, skins and hides, lead, and tin. Butter, beef, and coal are the only articles which have fallen. The level for December was 1,239, or slightly higher than for November.

*Meteorology.*—During the first half of the month relatively cool weather prevailed. In the second half the temperature was higher, especially in the North-west districts. The rainfall was above the average at isolated places on the coast, and Northern and Southern tablelands, but over the greater part of the State it was generally below normal.

# Statistical Bulletin—December, 1905.

\* The figures for December are not yet available. † Overseas only.

NOTE.—If the sum of the monthly values of imports and exports above be compared with the totals in Tables 6 and 7 it will be found that there are fairly considerable differences. These arise from the fact that the interstate movements of live stock were not included in the monthly statements in 1904, and also to the fact that gold of oversea origin was in some cases described as Australian produce. The monthly figures are, of course, preliminary only, and subject to revision at the end of the year.

No. 10.—Principal Articles Imported during December, and during 12 months—January to December.
